

### Project Performance Test

|               |                                                                                          |
|---------------|------------------------------------------------------------------------------------------|
| Date          | 26 july 2026                                                                             |
| Team ID       |                                                                                          |
| Project Name  | Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau |
| Maximum Marks |                                                                                          |

#### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter               | Screenshot / Values                                                                                                                                                                                |
|-------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.    | Data Rendered           | Housing datasets including sale prices, property features (square footage, bedrooms, bathrooms, property type), and location details.                                                              |
| 2.    | Data Preprocessing      | steps included: handling missing values, removing duplicates, normalizing categorical fields, creating derived variables (price per square foot, property age), and integrating multiple datasets. |
| 3.    | Utilization of Filters  | Filters applied for city, neighborhood, property type, and price range to allow dynamic exploration of housing trends.                                                                             |
| 4.    | Calculation fields Used | Calculated fields such as <i>Average Sale Price</i> , <i>Price per Square Foot</i> , <i>Property Age</i> , and <i>Feature Correlation Scores</i> .                                                 |
| 5.    | Dashboard design        | No of Visualizations / Graphs - 4 (Bar Graph,Text Table,Grouped Bar Chart,Histogram)                                                                                                               |
| 6     | Story Design            | No of Visualizations / Graphs -4 (Bar Graph,Text Table,Grouped Bar Chart,Histogram)                                                                                                                |
