

Project Design Phase
Proposed Solution Template

Date	26 July 2026
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Housing market data is vast, fragmented, and difficult to interpret. Buyers, sellers, and analysts struggle to identify patterns in sale prices and property features without a unified, visual analytical tool.
2.	Idea / Solution description	Develop an interactive Tableau dashboard that visualizes housing market trends, correlates property features with sale prices, and provides predictive insights for decision-making.
3.	Novelty / Uniqueness	Integrates multiple data sources (real estate listings, government datasets) into a single, dynamic visualization platform. Offers predictive modeling and feature-based trend analysis, unlike static reports.
4.	Social Impact / Customer Satisfaction	Empowers homebuyers and real-estate professionals with transparent, data-driven insights. Enhances trust and confidence in property decisions, contributing to fairer market understanding.
5.	Business Model (Revenue Model)	Freemium model: basic dashboards available for free; premium subscription for advanced analytics, predictive insights, and custom reporting for agencies and investors.
6.	Scalability of the Solution	Highly scalable through cloud-based deployment (IBM Cloud / Tableau Server). Can integrate additional datasets, expand to new regions, and support multiple user roles (buyers, sellers, analysts).
